

SERIGNE FALLOU MBACKE

Junior Data Analyst • Business Intelligence • Machine Learning

Gatineau, QC | 819 328-7675 | fallouinfo03@gmail.com | LinkedIn | GitHub

PROFESSIONAL SUMMARY

Graduate in Applied Data Science (DEC, Collège La Cité, April 2026) with hands-on experience across the full data pipeline: collection, cleaning, modeling, machine learning and data visualization with Power BI. Proficient in exploratory data analysis (EDA), classification and regression (Scikit-Learn, RandomForest), natural language processing (NLP) and cloud deployment (AWS). Detail-oriented, autonomous and results-driven, I am seeking a junior position in data analysis, business intelligence or data science.

TECHNICAL SKILLS

Programming Languages	Python, SQL, R, Java
Python Libraries	Pandas, NumPy, Scikit-Learn, TensorFlow, SciPy, Matplotlib, Seaborn
Business Intelligence	Power BI (DAX, Power Query, Star Schema), Excel (Pivot Tables, Advanced Formulas, Charts)
Machine Learning & AI	RandomForest, KNN, SVD, TF-IDF, NLP, Deep Learning, SHAP, Predictive Analytics
Databases	MySQL, MongoDB, Relational Modeling, Advanced Queries (CTEs, Window Functions)
Cloud & Tools	AWS (EC2, S3, RDS, Load Balancer), Flask, Git, GitHub, Jira, Agile/Scrum, REST API, Jupyter Notebook
Office Suite	Microsoft Office (Excel, Word, Outlook, PowerPoint)
Languages	French (Native) English (Functional, B2) Wolof (Native)

ACADEMIC PROJECTS

- BooksMatch – Hybrid Recommendation System** (Capstone Project, team of 5) 2026
Python · Scikit-Learn · SVD · NLP · Jina v4 · SHAP · Flask | [GitHub](#)
- Full ML pipeline on 196,296 real interactions: data cleaning, exploratory data analysis (EDA), item-based KNN collaborative filtering, Jina v4 semantic embeddings, Flask deployment.
 - Role: data preparation, EDA, cleaning pipeline, contribution to overall system architecture.
- Chronic Disease Analysis in Canada – Public Health** 2025
Python · Pandas · Seaborn · Matplotlib | [GitHub](#)
- Exploratory analysis of 20 years of government data (diabetes, stroke, hypertension, dementia): time trends, gender comparison, COVID-19 impact on diagnosis rates.
- Heart Disease Prediction – ML Classification** 2024
Python · Scikit-Learn · RandomForest · KNN | [GitHub](#)
- Advanced preprocessing pipeline (KNN imputation, encoding, normalization) and RandomForest classification on a complex medical dataset.
- AWS Cloud Deployment – Web Application** 2024
AWS EC2 · S3 · RDS · Load Balancer
- Highly available and scalable architecture deployed on AWS (EC2, RDS, S3, Load Balancer).
- Relational Database Design – Transportation Management** 2023
SQL · MySQL · Merise
- Relational database (10+ tables), complex queries (CTEs, window functions), performance indicators.

EDUCATION

DEC – Applied Data Science – Collège La Cité April 2026
Ottawa, ON

- Data analysis and visualization, machine learning, relational databases, cloud computing (AWS), Python / R / SQL development.
- Agile/Scrum project management (Jira); presentation of analytical results to stakeholders.

CERTIFICATIONS

Power BI – From Beginner to Expert (Udemy) 2024
Git and GitHub – From Beginner to Advanced (Udemy) 2023

WORK EXPERIENCE

Fish Counter Clerk – IGA Extra May 2024 – Present
Gatineau, QC

- Inventory management, daily stock tracking, bilingual customer service (French / English).

Cashier – Hess’ Your Independent Grocer Sept. 2023 – May 2024
Ottawa, ON

- High-volume transaction processing, cash reconciliation, bilingual customer service.
